

2. Basic integration of Python and R. (6 points)

Miguel Naranjo, 97943

2023-10-08

Installation of Python packages by using R and R studio

Implementation of a prime number finder. All steps MUST be clearly explained in a PDF document created by using R markdown. Marking will follow the criteria shown below:

- a. There is a section in the report dedicated to explanation of implemented code.
- b. There are subsections explaining each of the 3 requested items, including relevant code and screenshots when necessary.
- c. Codes can be used by installing and/or downloading the scripts, with no need for modifying any of the provided code.

Note: running your prime number finder should not trigger any package installation.
